Subject: Settlement

Gentlemen:

As a personal computer/internet professional, I am appalled at the terms of this settlement. It does virtually nothing to stop Microsoft's ruthless practices to own the internet and the personal computer industry.

The technology gaps provided in your settlement are big enough to drive a truck through, and be assured Microsoft will do just that in their quest to dominate all forms of electronic business.

This settlement is giving away the store, and should not stand.

Avery E. Dee
